

Solar Warranty & AMC Service in Kerala That Actually Protects Your Investment

Most solar warranties in Kerala are pieces of fine print that protect the installer, not you. Ours is a 25-year service commitment — backed by certified local technicians, live remote diagnostics, and a performance guarantee that compensates you in cash if we fall short.

Digital Records

< 1 Minute

Average WhatsApp or phone response time from our Kerala service team.

80%

Of support issues resolved remotely through inverter cloud diagnostics.

48 Hours

On-site technician visit guaranteed for any physical fault, across all Kerala districts.

Our 3-Layer Solar Support System

80% of solar system issues in Kerala are resolved without a single site visit. Here is exactly how we work through every problem — from inverter error codes to physical panel faults.

LEVEL 01

INSTANT

80%

ISSUES FIXED HERE

Phone & WhatsApp

Send a WhatsApp message and receive a response in under a minute. Our team diagnoses faults remotely using your inverter's cloud monitoring portal — no site visit required.

- Inverter error code diagnosis
- KSEB bill analysis (send photo)
- Generation/output troubleshooting

LEVEL 02

24-48 HRS

15%

ISSUES DIAGNOSED HERE

Remote Diagnosis

You share panel photos via WhatsApp. Our team cross-references live inverter portal data, identifies anomalies, and generates a Solar Health Report. Guided self-fix steps included where safe to attempt.

- Panel photo analysis
- Inverter portal data cross-check
- Guided self-fix where applicable

LEVEL 03

48 HRS MAX

05%

NEED A PHYSICAL VISIT

Technician Dispatch

When remote resolution is not possible, a KSEB-certified Kerala technician is dispatched within 48 hours. We cover all 14 districts — from Thiruvananthapuram to Kasaragod.

- KSEB-certified Kerala technician
- Physical panel and wiring inspection
- Post-repair performance test

When Is a Service Visit Free vs. Chargeable?

FREE VISIT

Zero cost to you

- Any defect caused by our installation (within 5-year workmanship warranty)
- Inverter failure within the manufacturer warranty period
- Mounting or structural failure within the 10-year structural warranty
- Roof leak traced directly to our installation work
- Year 1 annual inspection (included with every system)
- Any visit where we confirm the fault is ours
- Performance shortfall within the Energy Loss Guarantee threshold

CHARGEABLE VISIT

When costs apply

- Damage from third-party tampering or unauthorized DIY modification
 - Panel cleaning visits beyond your plan's included frequency
 - Inverter failure after manufacturer warranty expiry (without extended cover)
 - Panel damage from bird strikes, debris, or storm impact
 - Additional site visits beyond your plan's annual allowance
 - System expansion, new panel additions, or capacity upgrades
- All charges are quoted in writing upfront — no surprise invoices, ever.

What's Covered and for How Long?

Component	Standard Warranty	Flarize Protection	Out-Of-Pocket Saving
Solar Panels (Tier 1) Monocrystalline / Bifacial	10-12 Years	25-30 Years Performance	₹1.2L - ₹2.5L
Solar Inverter On-grid / Hybrid	5 Years	10 Years Extended	₹45,000 - ₹85,000
Mounting Structure HDBG / Aluminium Rails	1 Year	10 Years Structural	₹25,000+
Workmanship Installation quality	None	5 Years Guaranteed	₹15,000/visit

Important: Flarize workmanship warranty covers faults caused by our installation. We assist with all manufacturer warranty claims at no extra charge.

How Our Performance Guarantee Actually Works

If your solar system underperforms its guaranteed baseline output due to a covered fault — and we cannot resolve it within our service window — you receive cash compensation for every unit lost. Here is the exact process.

01

System Monitors Generation Daily

We track your system's actual output against its site-specific modeled figure every billing cycle, using your inverter's cloud monitoring portal. No manual reporting is needed from your side. Your on-grid solar system's performance data feeds directly into our diagnostic platform.

02

Alert Triggered at 8% Gap

If actual generation falls more than 8% below the expected output for your system size, roof orientation, and Kerala location, our platform flags it automatically. You do not need to notice the shortfall before we act.

03

If Unresolved, You Get Paid

Every unit lost beyond the service resolution window is compensated at current KSEB retail rates. In writing. No disputes, no delays, no chasing. This is the only solar energy loss guarantee offered by a Kerala installer with a documented payout process.

Zero Cost, Zero Stress Support

Free value-added services included with every Flarize installation.

Warranty Filing

We handle all paperwork and claims directly with panel and inverter manufacturers on your behalf. No forms to fill, no manufacturer portals to navigate, no follow-up calls.

KSEB Liaison

Help with net metering delays, tariff revision disputes, or billing errors? Our team manages KSEB correspondence across all Kerala districts so you do not have to—metering issues or tariff change requests.

Surge Protection

Every Flarize installation includes a site-specific lightning protection assessment before Kerala's monsoon season. We flag risks proactively — not after a fault occurs.

Transfer Support

Moving to a new address in Kerala? We coordinate safe dismantling, transport, and reinstallation of your solar system — maintaining your warranty continuity throughout.

Long-Term Solar Support That Stays With You

SolarCare helps keep your solar system performing efficiently with ongoing monitoring, maintenance support, warranty assistance, and performance tracking — long after installation.

Live system monitoring and performance tracking

Priority support for maintenance and service issues

Warranty assistance and preventive care guidance

Real Complaints. Honest Answers.

These aren't hypothetical questions. Every concern below comes directly from Kerala's largest solar community — 500+ members sharing real post-install experiences.

CONCERN #1 - INSTALLER ACCOUNTABILITY

"My installer stopped answering calls three months after installation. Phone switched off. No service for over eight months." — Real complaint, Ernakulam

THE PROBLEM

Most solar companies in Kerala subcontract installations to third-party teams. Once the project payment clears, the incentive to support you long-term disappears. Your warranty becomes worthless if the company folds or exits the market.

THE SOLUTION

Your solar service contract is with Flarize directly — not with an individual installer or subcontractor. Even if a field partner leaves our network, your 25-year service obligation continues unchanged. We maintain digital records of your installation, system specs, and full service history at my.flarize.com

CONCERN #2 - LOW GENERATION

"My 3kW system is producing only 12 units per day in peak summer. The company says no one else is complaining." — Real complaint, Thrissur

CONCERN #3 - WARRANTY CLAIM REJECTION

"The inverter failed in Year 4. The manufacturer said the warranty is voided because there are no documented maintenance records." — Real complaint, Kozhikode
